

**RoHS Directive 2011/65/EU
Restriction of the use of Hazardous Substances**

The EU RoHS-Directive 2011/65/EU restricts the use of certain hazardous substances in electrical and electronic equipment. The restrictions were imposed to preserve the environment, improve recycling possibilities and minimize human exposure. The relevant substances and maximum concentration values tolerated by weight in homogeneous materials are:

- Lead (0,1 %)
- Mercury (0,1 %)
- Cadmium (0,01 %)
- Hexavalent chromium (0,1 %)
- Polybrominated biphenyls (PBB) (0,1 %)
- Polybrominated diphenyl ethers (PBDE) (0,1 %)
- Bis(2-ethylhexyl) phthalate (DEHP) (0,1 %)
- Butyl benzyl phthalate (BBP) (0,1 %)
- Dibutyl phthalate (DBP) (0,1 %)
- Diisobutyl phthalate (DIBP) (0,1 %)

Conformity with all CE relevant regulations, including the requirements of the most recent amendments for the RoHS Directive, is attested in the CE Declarations of Conformity. In addition, RoHS compliance of all sales items (such as accessories of products) that are not subject to the CE declaration requirement is also confirmed by this letter. The above is based on our current best knowledge and on information provided by our suppliers.

Products by Zumtobel meet the highest quality standards and boast an extremely long service life. In order to ensure and continuously improve product and service quality, an uncompromising quality management system has been implemented for all fields of functions, from administration through to production and transportation. Customers, suppliers, employees and partners benefit from this system. All Zumtobel production sites have been certified in compliance with the international ISO 9001:2015 standard.
