# SACE Emax 2/E

## Introduction

High-performance air circuit breakers over 690V.

ABB SACE Emax 2/E circuit breakers can control many demanding applications effectively and simply, with the highest availability and continuity of service.

The world of renewable energy is evolving rapidly, generating major changes in electrical power distribution.

This development prompts an increased focus on:

- Power continuity with very high performance requirements, even at elevated altitudes,
- Smarter and faster maintenance,
- Optimized footprint.

These trends lead to new customer and application demands. As a result, ABB has further enhanced the innovative Emax 2/E product line, which was born with Emax 2/E9 at 800-900V.

The Emax 2/E product line is now enriched with /E10 at 1000V and /E12 range, capable of reaching 65kA breaking capacity up to 1380V.

Emax 2/E solutions are certified according to IEC 60947, with CCC approval, and include both circuit breakers and switch disconnectors.

In addition, the Emax 2 portfolio offers the -A/E version, UL certified up to 1000V.

# SACE Emax 2/E

## Range overview

SACE Emax /E comprises a complete range of air circuit breakers and air switch-disconnectors that extends Emax 2 ratings over 690V. The new /E12 version covers application at 4000A and 1000-1200V and up to 1380V (maximum voltage):

<b>Emax 2</b>	<b>6300A</b>	<b>690V</b>
<b>Emax 2/E9</b>	<b>6300A</b>	<b>900V</b>
<b>Emax 2/E10</b>	<b>4000A</b>	<b>1000V</b>
<b>Emax 2/E12</b>	<b>4000A</b>	<b>1200V</b>
		<b>1380V</b>

The Emax 2/E9, Emax 2/E10 and E12 circuit breaker ranges also cover additional performances according to IEC 60947-2 Annex H for use in IT systems (networks with isolated neutral) like photovoltaic installations:

<b>Emax 2</b>	<b>6300A</b>	<b>690V</b>
<b>Emax 2/E10 and E12</b>	<b>4000A</b>	<b>800V</b>
<b>Emax 2/E9</b>	<b>2500A</b>	<b>900V</b>

Emax 2 -A/E UL1066 can reach 730V, which means a +15% tolerance over the typical 600V nominal voltage, with a complete offer up to 5000A nominal current. The new Emax 2 -A/E10 UL489 goes further, up to 1000V:

<b>Emax 2-A UL1066</b>	<b>6000A</b>	<b>635V</b>
<b>Emax 2-A/E UL1066</b>	<b>5000A</b>	<b>730V</b>
<b>Emax 2-A/E10 UL489</b>	<b>3200A</b>	<b>1000Y/577V</b>

# SACE Emax 2/E

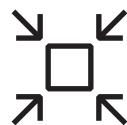

## Value proposition

One range, many advantages.

### Top performances

The SACE Emax 2/E range extends Emax 2 performances to higher voltages with solid breaking capacities, achieving up to 100kA at 800V, 90kA at 900V, 85kA at 1000V, and 65kA at 1200V (up to 1380V) to better support increasing power needs in demanding applications around the world.

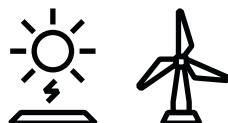

### Space saving

The SACE Emax 2/E is the most compact circuit breaker on the market. SACE Emax 2/E offers the highest performance in the small space. Its compact dimensions allow the size of switchboard to be reduced by up to 30 percent, compared to a standard solution.

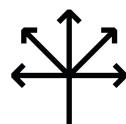

### Energy efficiency

The SACE Emax 2/E range is here to support the energy efficiency trend in electricity generation and distribution. Achieving a higher service voltage of 1200V AC (up to 1380V) helps to cut power losses and make our planet a better place. Full compatibility with ABB Ability™ Energy and Asset Manager allows data processing from electrical equipment to optimize the system performance.

### Renewable oriented

The SACE Emax 2/E range supports renewable energy growth with increased performances for wind and solar applications, reaching up to 1380V AC (equivalent to, e.g., 1150V + 20% tolerance) and covering single-pole short-circuit testing at 800-900V (IT networks). Performances are guaranteed in a wide range of operating temperatures and installation altitudes.

### Full flexibility

The SACE Emax 2/E range offers solutions to find the best fit for all applications. With four sublines (/E9, /E10, /E12 for IEC and -A/E for UL) and four circuit breaker frames, it is easier to cover specific application needs with the right voltages at the best ratings. All versions are available in fixed and withdrawable version and can be fitted with electrical and mechanical accessories in common with the standard SACE Emax 2 range.

### Connectivity

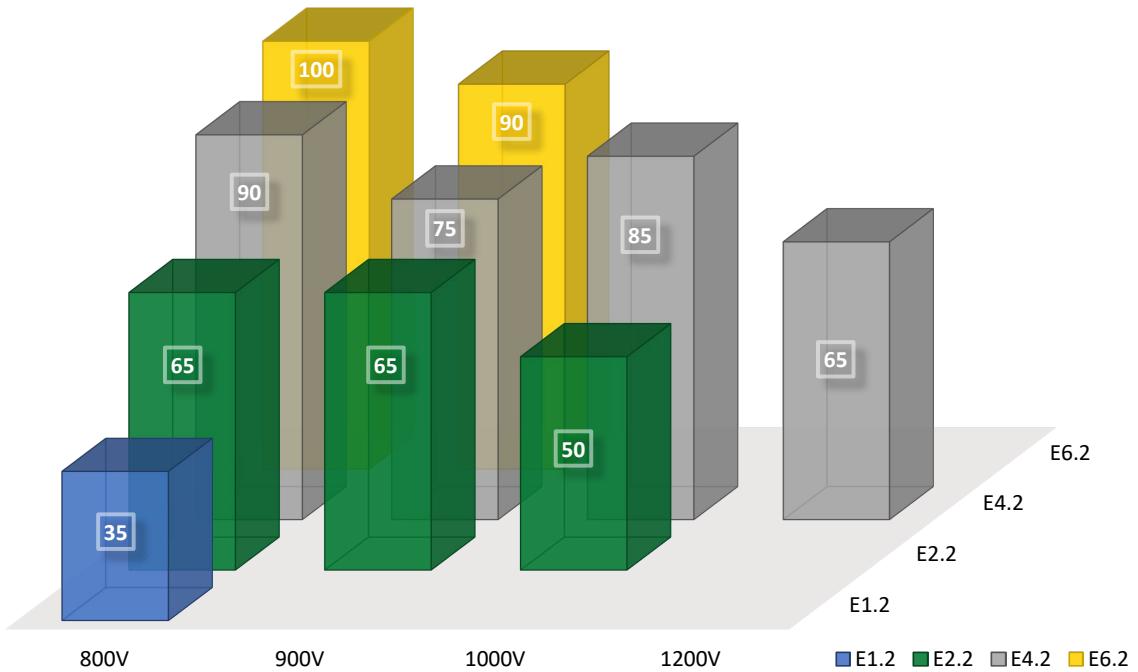

SACE Emax 2/E range of circuit breakers can be integrated into all automation and energy management systems to improve productivity and energy consumption, and to carry out remote service. All circuit breakers can be equipped with embedded communication modules that offer Modbus, Profibus, and DeviceNet™ protocols as well as the modern Modbus TCP, Profinet, EtherNet™.

# SACE Emax 2/E

## Key performances

SACE Emax 2/E covers a wide range of voltages over 690V AC with four frames.

—  
Maximum short-circuit performances (kA) on /E range

# SACE Emax 2/E

## Trip units

SACE Emax 2 trip units offer a complete range of solutions, also in the /E versions, for any installation requirements, providing a flexible choice of protection, measurement, supervision and connectivity features.

**Ekip Dip: The standard trip unit**

**Ekip Dip LSIG**  
**Ekip Dip LSIG**

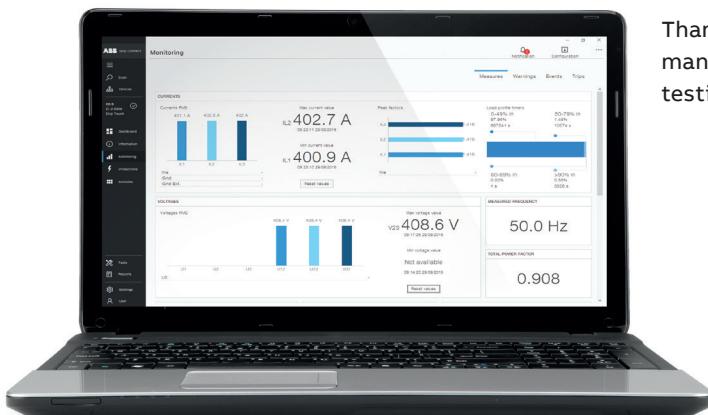

- Overcurrent protection for distribution systems
- Phase and neutral current measurements
- LED Permanent trip cause signalization
- Ekip Multimeter to display data and measurements

**Ekip Touch: The smart trip unit**

**Ekip Touch LSIG**

- Advanced set of protections and measurements, always upgradable and customizable
- Intuitive touchscreen interface
- High measurement accuracy of electrical parameters
- Hi-Touch version with additional features (available on /E9).

Thanks to Ekip Connect software, it is easy to manage configuration, monitoring & analysis, testing & reporting.

## SACE Emax 2/E

### Applications for Emax 2/E

ABB Emax 2/E quality and experience guarantees excellent reliability in many different market segments.

Emax 2/E is well suited for:

- Wind turbines
- Solar plants
- Other demanding applications with high voltage or altitude requirements

For your installations, choose the performance, quality and experience of ABB

# SACE Emax 2/E

## Installation

The SACE Emax 2 /E range is based on standard Emax 2 frame sizes. In this section we present the main differences related to /E performances.

### Altitude

SACE Emax 2 air circuit breakers guarantee rated performances up to 2000 meters above sea level. Beyond this altitude, the performance of the circuit breakers is subject to derating, which can be

measured by means of the variation in maximum rated service voltage and rated uninterrupted current.

Altitude		[m]	2,000	3,000	4,000	5,000
Rated service voltage Ue	Versions 690V	[V]	690	623	544	477
	Versions 730V	[V]	730	659	576	498
	Versions 900V	[V]	900	813	710	623
	Versions 1000V	[V]	1000	903	789	692
	Versions 1200V	[V]	1200	1084	946	830
Rated current		[% In]	100	98	93	90

### Insulation distances

The circuit breakers can be connected to the main power system using the most common configurations and dimensions of copper bars.

- Insulation distance of installation cubicle

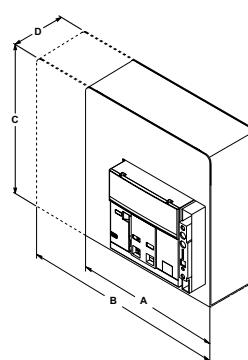

#### Fixed circuit breakers

	A	B	C	D
[mm]	3p	4P		
<b>E1.2</b>	250	322	382.5	130
<b>E2.2</b>	400	490	500	221
<b>E4.2</b>	500	600	500*	221
<b>E6.2</b>	900	1000	500	221

(\*) For /E12 Fixed, 500mm with insulated roof panel; 600mm otherwise.

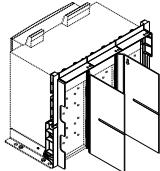

#### Withdrawable circuit breakers

	A	B	C	D
[mm]	3p	4P		
<b>E1.2</b>	280	350	440	252
<b>E2.2</b>	400	490	500	355
<b>E4.2</b>	500	600	500	355
<b>E6.2</b>	900	1000	500	355

- Separator PB and insulation frame

The rear part of the circuit breaker has been designed with specific slots in which insulating walls are placed to facilitate segregation between polarities. Phase separators are mandatory with all Emax 2/E circuit breakers.

For the withdrawable version, phase separators must be ordered as loose parts. For the fixed version, they are provided as standard with an additional insulation frame protection kit to be installed on field (see document [1SDH001000R0746](#)).

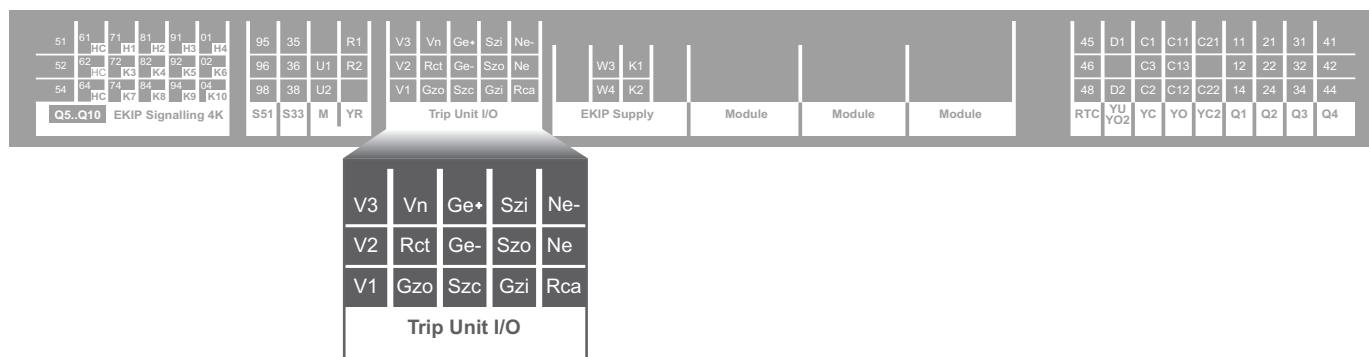

# SACE Emax 2/E

## Trip Unit features

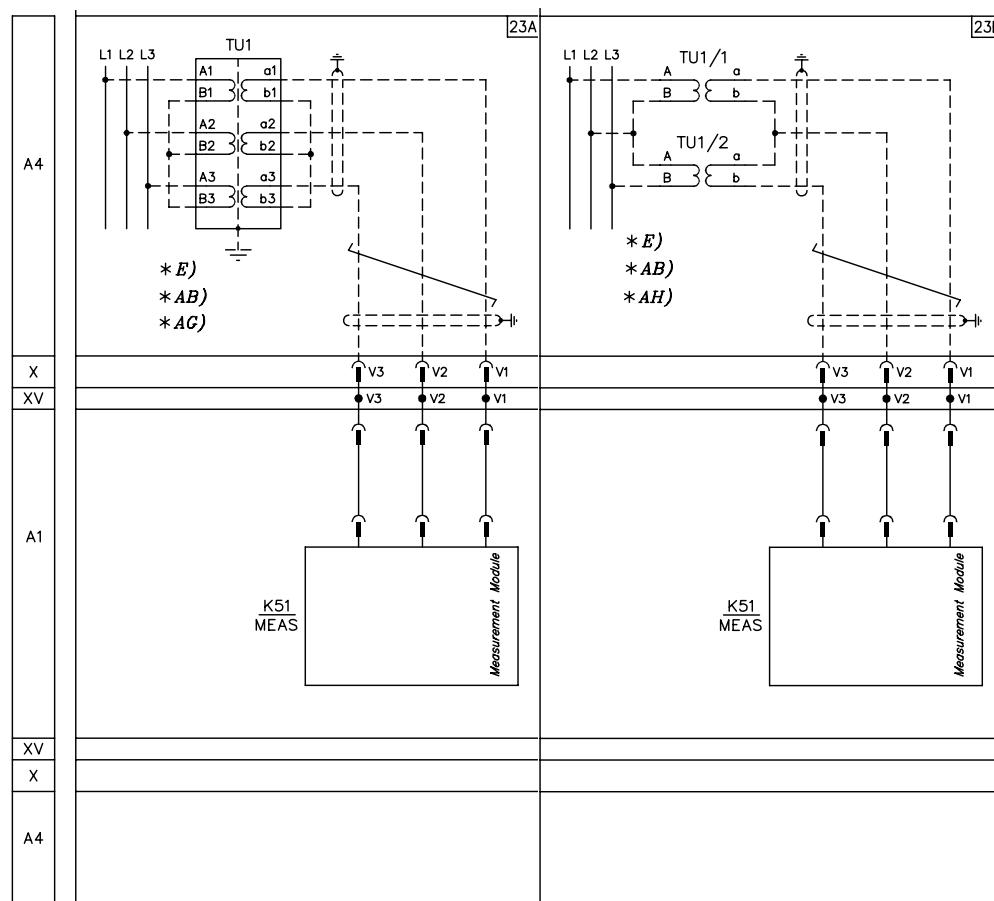

The Measurement Enabler module is supplied with Ekip Touch trip units by default, enabling the trip unit to measure phase and neutral voltages. For rated voltages over 690V, external insulation voltage transformers must be installed and connected to the terminal box according below scheme.

The installation of external voltage transformers does not guarantee Class 1 accuracy.

Ekip Synchrocheck module is not compatible with Emax 2 /E12.

**23 A/B) Measurement Enabler/Measurement Enabler with voltage sockets with external voltage transformer**

# SACE Emax 2/E

## Connections and dimensions

The SACE Emax 2 circuit-breakers offer a wide variety of terminals, thereby always guaranteeing an optimal solution for connection to the power circuit.

Phase separators are mandatory with Emax 2/E circuit breakers.

For withdrawable version, phase separators have to be ordered as loose part.

For fixed version, they are provided as standard.

# SACE Emax 2/E12

## Range

IEC circuit breakers at 1000-1150-1200V up to 1380V

The SACE Emax2/E12 automatic circuit breakers have been certified according to IEC 60947-2. Three levels of performances are offered: "S" with essential performances, "H" with advanced breaking capacities (85kA@1000V, 65kA@1200V), and "V" with extended voltage range up to 1380V.

Devices are available in fixed and withdrawable versions, and can be fitted with a vast assortment of electrical and mechanical accessories already available for the standard SACE Emax 2 range.

### Common data

Rated service voltage Ue	[V]	1200
Rated insulation voltage Ui	[V]	1500
Rated impulse withstand voltage Uimp	[kV]	15
Frequency	[Hz]	50-60
Number of poles		3
Version		Fixed-Withdrawable
Suitable for isolation according to		IEC 60947-2

### SACE Emax 2/E12

		E4.2		
Performance levels		S/E12	H/E12	V/E12

	1150V	[No. cycles x 1000]	1
	1200V	[No. cycles x 1000]	1
	Frequency	[Oper./Hour]	10

(\*) with regular maintenance prescribed by the manufacturer.

# SACE Emax 2/E12

## Range

IEC switch disconnectors at 1200V up to 1380V

Switch disconnectors at 1200V are identified with the abbreviation /E12 MS and have been certified according to IEC 60947-3. The switch disconnectors are derived from the corresponding automatic circuit breakers, and they have the same dimensions and accessory options, without protection trip units.

The device, when in the open position, guarantees an isolating distance between the main contacts of the circuit breaker that is sufficient to ensure that the installation downstream is not live.

### Common data

Rated service voltage Ue	[V]	1200
Rated insulation voltage Ui	[V]	1500
Rated impulse withstand voltage Uimp	[kV]	15
Frequency	[Hz]	50-60
Number of poles		3
Version		Fixed-Withdrawable
Suitable for isolation according to		IEC 60947-3

### SACE Emax 2/E12

## Standard supply and accessories

The fixed versions of SACE Emax 2 switch disconnectors are always supplied as standard with the following accessories: IP30 protection for switchgear door, lifting plates and adjustable rear terminals mounted in HR – HR configuration (for /E12 4000A: SVR – SVR configuration).

The withdrawable versions of switch disconnectors are always supplied as standard with the following accessories: closed circuit breaker racked-out mechanism lock, lifting plates, lever for racking in and racking out and anti-insertion lock. The fixed parts features are: IP30 protection for switchgear door, anti-insertion lock, standard shutter lock – SL and adjustable rear terminals mounted in HR – HR configuration (for /E12 4000A: SVR – SVR configuration).
