Limit switches

ABB limit switches are the easiest reliable way to convert mechanical movements into electrical signals. Use our wide offer to match your application.

Reliable in extreme conditions

Ready for anything

Plastic or metal casing limit switches are designed to operate in the most difficult environments. A high degree of protection up to IP67 and the positive contact opening, guarantee reliable operation.

Continuous operation

Keep your installation running 24h a day

Limit switches secure your uptime. Their high mechanical durability can handle up to 30 million operations with contacts that are mechanically linked to actuators.

Easy to install

Easy to use

Limit switches are easy to install and to use thanks to their three different types of electrical connections and cable length, in order to satisfy every design specifications.

Limit Switches - Range overview

Product selection guide

Design	Compact, Pre-wired		Standard	
Material	Plastic	Metal	Plastic	Metal
Types	LS20P, LS21P	LS20M, LS21M	LS32P, LS33P, LS35P	LS32M, LS33M, LS35M
Dimensions (W x H x D)	30 x 49 x 16	30 x 49 x 16	30 x 53 x 30	30 x 55 x 33
Rounded values for body only. For precise dimensions with actuator, please refer to ordering details pages

Limit switches

Limit switches are electromechanical devices. The contacts are mechanically linked to an actuator for visible operations. By combining different types of actuators and casings, our limit switches are perfectly suited to a large variety of applications.

Prewired LS2..

Cable inlet LS3.., LS4..

Double insulation

A **Class II** or **double insulated** electrical appliance does not require a safety connection to electrical earth (ground).

The degree of protection required for electrical equipment depends on the environmental characteristics.

Ingress Protection	First digit solids protection	Second digit liquids protection
IP	6 Dust Tight	5 Low pressure water jet
		6 Powerful water jets
		7 Temporary immersion (up to 1 m)

Actuators and movements to be detected

Actuator type	Symbol	Actuator number	Comments*
Plungers		10 11 21	Plastic or metal plunger
Roller plungers		12 13 14 15 22 24	Plastic or metal roller Roller or ball at the tip
Roller levers + plunger		31 32	For horizontal or vertical movement
Roller levers		41 42 45 46	Plastic, metal or rubber roller Different roller diameters Different lever sizes and shape
Adjustable roller levers		51 52	Plastic, metal or rubber roller Different roller diameters
Rod Levers		71 72	Metal, fiber glass or nylon rod Different rod diameters
Spring rod levers		91 92	Plain or insulated spring tip

* NOTE : a same number can be a slightly different actuator from one range to the other. For accurate description of the actuator, please refer to the ordering details pages.
Ex : actuator n°13 is a plastic roller plunger for LS20 and LS30 but a metal roller plunger for LS40 ranges.

30 Technical data

LS2..P – Compact, prewired – Plastic casing – IP67

Double insulation □ – 30 mm width – 1 N.O. + 1 N.C. Snap Action contacts

LS2..P limit switches are used in applications where high degree of protection is needed along with limited mounting space.

The cable coming out of the side or the bottom makes it easier to align the actuator for the application without bending the cable.

The 30 mm wide bodies are made of fiber-glass reinforced UL-V0 material, sealed with epoxy for double insulation and IP67 protection.

Here is the full range of actuator available for the LS2-P series. In grey are the ones available in this page.

LS2..M – Compact, prewired – Metal Casing – IP67

30 mm width – 1 N.O. + 1 N.C. Snap Action contacts 30 mm width

LS2..M limit switches are used in applications where high degree of protection is needed along with limited mounting space.

The cable coming out of the side or the bottom makes it easier to align the actuator for the application without bending the cable.

The 30 mm bodies are made of zinc alloy material (Zamak), sealed with epoxy resin for IP67 protection. The high degree of protection and the high resistance to corrosion allows them to be mounted outside.

LS3..P – Standard – Plastic Casing – IP65

Double insulation □ - 30 mm width – 1 N.O. + 1 N.C. Snap Action contacts

LS3..P limit switches are used in main applications for an easy and reliable movement detection. The cable inlet on the bottom is threaded to allow the use of a cable gland.

The 30 mm wide bodies are made of fiber-glass reinforced UL-V0 material for double insulation and IP65 protection.

Here is the full range of actuator available for the LS3..P serie. In grey are the ones available in this page.

LS3..P – Standard – Plastic Casing – IP65

Double insulation  - 30 mm width – 1 N.O. + 1 N.C. Snap Action contacts

LS3..P limit switches are used in main applications for an easy and reliable movement detection. The cable inlet on the bottom is threaded to allow the use of a cable gland.

The 30 mm wide bodies are made of fiber-glass reinforced UL-V0 material for double insulation and IP65 protection.

67 Technical data

LS4..P – Standard reinforced – Plastic Casing – IP65

Double insulation  - 40 mm width – 1 N.O. + 1 N.C. Snap Action contacts

LS4..P limit switches are used in every applications especially when products will be mounted in harsh environment. The 4 mounting holes and the thick plastic body make it the more resistant of our range.

The cable inlet on the bottom is threaded to allow the use of a cable gland.

The 40 mm wide bodies are made of fiber-glass reinforced UL-V0 material and offer double insulation and IP65 protection.

	Plastic casing	Metal casing
Standards	IEC 60947-1, IEC 60947-5-1, EN 60947-1, EN 60947-5-1, UL 508	
Certifications - Approvals	cULus-	
Air temperature near the device		
during operation	– 25 ... + 70 °C	
for storage	– 30 ... + 80 °C	
Mounting positions	All positions are authorized	
Protection against electrical shocks (acc. to IEC 536)	Class II - double insulation	Class I
Degree of protection (acc. to IEC 529 and EN 60529)	IP65	IP66 (1)

Electrical data

Rated insulation voltage U_i	500 V (degree of pollution 3)	
Rated impulse withstand voltage U_{imp} (acc. to IEC 60947-1 and EN 60947-1)	6 kV	
Conventional enclosed thermal current I_{th} acc. to IEC 60947-5-1 and EN 60947-5-1) $\theta < 40\text{ °C}$	10 A	
Short-circuit protection gG type fuses	10 A	
Rated operational current		
I_e / AC-15 acc. to IEC 60947-5-1	24 V - 50/60 Hz	10 A
	120 V - 50/60 Hz	6 A
	400 V - 50/60 Hz	4 A
acc. to UL 508	A600	A300
I_e / DC-13 acc. to IEC 60947-5-1	24 V DC	6 A
	125 V DC	0.55 A
	250 V DC	0.4 A
acc. to UL 508	Q600	Q300
Positivity	Contacts with positive opening operation as per IEC 60947-5-1 chapter 3 and EN 60947-5-1	
Resistance between contacts	mΩ	25
Mechanical durability	millions of operations	
	LS4...	
	15 : with actuators 11, 12, 31, 32	30 : with actuators 11, 12, 13, 31, 32
	10 : with actuators 13, 41, 42, 51, 52, 71, 72	25 : with actuators 41, 42, 51, 52, 71, 72
	> 5 : with actuators 91, 92	10 : with actuators 91, 92
Electrical durability (acc. to IEC 60947-5-1 appendix C) max. switching frequency	3600 cycles/h	
Connecting data of contact blocks		
Connecting terminals	M3.5 (+,-) pozidriv 2 screw with cable clamp	
Connecting capacity	1 or 2 x mm ²	0.75 mm ² ... 2.5 mm ²
Terminal marking	According to IEC60947-5-1	
B10d	30 millions of operations	

(1) Except for LS3..M52, LS3..M92, LS4..M72 and LS4..M92 : the degree of protection is IP65.

Electrical durability for AC-15 utilization category

Electrical durability for DC-13 utilization category

Snap action	
Power breaking for a durability of 5 million operating cycles	
Voltage	24 V
	9.5 W
Voltage	48 V
	6.8 W
Voltage	110 V
	3.6 W

Cable glands - NCG series

Nylon, general purpose

Nylon cable glands for general purpose use, OEM and industrial/commercial applications.

Certifications / Standards

(Refer to tables for certifications details)

Conform to

UL514B / CSA C222.2 No18.3
(see table for details)
EN 62444
RoHS (Restriction of Hazardous Substances Directive) 2011/65/EU Incorporating 2015/863 amendment to Annex II
WEEE (Waste Electrical Electronic Equipment Directive) 2002/96/EC
LVD (Low Voltage Directive) 2014/35/EU

Working temperature

Normal use: -20 to +100 °C (-4 to +21 °F)
Short term: -30 to +150 °C (-22 to +302 °C)

Chemical resistance guide

See publication TDS000081

Ingress protection

To ensure ingress protection, use suitable gasket and lock nut when inquired.

IP66

IP68 (5 bar, 30 mins)

NEMA 4

Material

Halogen free nylon (PA6) construction

Available in Black, Grey and light grey

Chloroprene seals

ISO Thread glands

NOTE : For LS 35P and LS45P, the thread is 10 mm deep. the cable gland will not be completely screwed inside the thread.

Limit Switches Plastic or Metal Casing

Travel and Operation Diagrams

P₀ Free position

position of the switch actuator when no external force is exerted on it.

P_A Operating position

position of the switch actuator, under the effect of force **F1**, when the contacts leave their initial free position.

P_P Positive opening position

position of the switch actuator from which positive opening is ensured.

L Max. travel position

maximum acceptable travel position of the switch actuator under the effect of a force **F1**.

C₁ Pre-travel (average travel)

distance between the free position **P₀** and the operating position **P_A**.

C_P Positive opening travel

minimum travel of the switch actuator, from the free position, to ensure positive opening operation of the normally closed contact (N.C.).

C₂ Over-travel (average travel)

distance between the operating position **P_A** and the max. travel position **L**.

C_L Max. travel (maximum travel)

distance between the free position **P₀** and the max. travel position **L**.

C₃ Differential travel (C₁-C₄) (average travel)

travel difference of the switch actuator between the operating position **P_A** and the release position **P_R**.

C₄ Release travel (average travel)

distance between the release position **P_R** and the free position **P₀**.
