Safety modules XPSAXE, XPSAC

For Emergency stop and switch monitoring - Category 0

# Catalog July 2019

### Get technical information about your product

Each commercial reference presented in a catalog contains a hyperlink. Click on it to obtain the technical information of the product:

- Characteristics, Dimensions and drawings, Mounting and clearance,
   Connections and schemas, Performance curves
- Product image, Instruction sheet, User guide, Product certifications, End of life manual

# Find your catalog

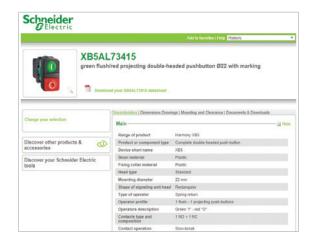

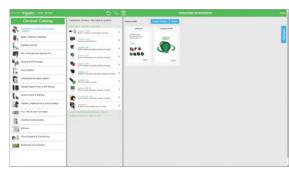

- With just 3 clicks, you can reach the Industrial Automation and Control catalogs, in both English and French
- > Download Digi-Cat with this link

## Select your training

- > Find the right <u>Training</u> for your needs on our Global website
- > Locate the training center with the selector tool, using this link

- Updated quarterly
- Embeds product selectors and configurators, 360° images, training centers
- · Optimized search by commercial reference

Safety modules XPSAXE for Emergency stop and switch monitoring

#### **Operating principle**

Safety modules **XPSAXE** are used for monitoring Emergency stop circuits conforming to standards EN/ISO 13850 and EN/IEC 60204-1 and also meet the safety requirements for the electrical monitoring of switches in protective devices conforming to standard EN/ISO 14119.

- They provide protection for both the machine operator and the machine by immediately stopping the dangerous movement on receipt of a stop instruction from the operator, or on detection of a fault in the safety circuit itself
- To aid diagnostics, the modules have LEDs which provide information on the monitoring circuit status.
- The XPSAXE module has 3 safety outputs and a relay output for signalling to the PLC

#### Maximum achievable safety level

- PL e/Category 4 conforming to EN/ISO 13849-1
- SILCL3 conforming to EN/IEC 61508 and EN/IEC 62061

#### **Product certifications**

- UL
- CSA
- BG

Description	Connection	Number of	Additional	Supply	Reference	Weight
		instantaneous opening safety circuits	outputs			kg/ <i>lb</i>
Safety modules for Emergency stop and switch monitoring	Captive screw clamp terminals Terminal block removable from module	3	1 relay	∼ and 24 V	XPSAXE5120P	0,229/ 0,505

#### Safety modules XPSAC for Emergency stop and switch monitoring

#### **Operating principle**

Safety modules **XPSAC** are used for monitoring Emergency stop circuits conforming to standards EN/ ISO 13850 and EN/IEC 60204-1 and also meet the safety requirements for the electrical monitoring of switches in protective devices conforming to standard EN/ISO 14119.

- They provide protection for both the machine operator and the machine by immediately stopping the dangerous movement on receipt of a stop instruction from the operator, or on detection of a fault in the safety circuit itself.
- To aid diagnostics, the modules have LEDs which provide information on the monitoring circuit status.
- The XPSAC module has 3 safety outputs and a solid-state output for signalling to the PLC.

#### Maximum achievable safety level

- PL e/Category 4 conforming to EN/ISO 13849-1
- SILCL3 conforming to EN/IEC 61508 and EN/IEC 62061

#### **Product certifications**

- UL
- CSA
- TÜV
