

# Multi-function Compact Inverter M1 Series

CSM\_M1\_DS\_E\_3\_1

## Advanced position control and EtherCAT® connectivity maximize potential of your motion system

- Nine types of motor control methods
- High starting torque: 200% at 0 Hz  
(vector control with speed sensor)
- Maximum output frequency: 590 Hz
- Dual rating: Heavy load mode (1 min at 150%, 0.5 s at 200%)  
and light load mode (1 min at 120%)
- Supports induction and PM motors (up to 128 poles)
- Position control (built-in ABZ phase encoder input)
- Torque control (in vector control)
- Safety functionality: STO (Cat. 3/PLe according to ISO 13849-1)
- Two safety inputs + EDM output as standard
- Configuration using integrated development environment Sysmac Studio
- Built-in EtherCAT communications (3G3M1-□□□□□-ECT)

# M1 Series

## Standard Specifications

### Inverter 3G3M1

#### Three-phase 200-V Class

HHD: Heavy load, HND: Light load

Item		Three-phase 200 V

Dimensions (Width × Height) [mm]		68 × 127			110 × 130			140 × 130	180 × 220		220 × 260		250 × 400	
Dimensions (Depth) [mm]		98	113	145	156			171	203		STD: 203 ECT: 208			

\*1. The maximum applicable motor capacity is given for a standard four-phase motor. When selecting an inverter, select not just by kW but also ensure that the inverter rated output current is greater than the motor rated current.

\*2. In calculating the rated capacity, the rated output voltage is assumed to be 200 V or 240 V.

\*3. A voltage higher than the power supply voltage cannot be output.

\*4. When Carrier Frequency (F26) is set to the following or below, derating is required.

HHD mode...A2001 to A2037: 8 kHz, A2055 to A2185: 10 kHz

HND mode...A2001 to A2037: 4 kHz, A2055 to A2150: 10 kHz, A2185: 4 kHz

Refer to the *Multi-function Compact Inverter M1 Series Standard Type User's Manual* (Cat. No. I669) or the *Multi-function Compact Inverter M1 Series Built-in EtherCAT® Communications Type User's Manual* (Cat. No. I670) for details.

\*5. The following shows the calculated value when the power supply capacity is 500 kVA (10x the inverter capacity when the inverter capacity exceeds 50 kVA) and when a %X = 5% power supply is connected.

\*6. The numeric value is the average braking torque per individual motor. (Varies according to motor efficiency)

\*7. Allowable ambient temperature of 40°C or below of A2022 to A2037 in the HND mode. The rated output current in the HND mode decreases by 1% for every temperature increase of 1°C when the ambient temperature is 40°C or more.

## Three-phase 400-V Class

HHD/HD: Heavy load, HND/ND: Light load

<b>Location</b>	At a maximum altitude of 1,000 m, indoors (without corrosive gases or dust)												

\*1. The enclosure rating complies with JISC0920.

\*2. If you must use the motor at higher than 50/60 Hz, check the allowable maximum motor speed and other information with the motor manufacturer.

\*3. In the HND/ND (light load) mode or PM motor mode compared with the HHD/HD (heavy load) mode, for some parameters, the default data and setting range also differ. Refer to the *Multi-function Compact Inverter M1 Series Standard Type User's Manual* (Cat.No.I669) or the *Multi-function Compact Inverter M1 Series Built-in EtherCAT® Communications Type User's Manual* (Cat.No.I670) for details.

\*4. By default, the maximum frequency is adjusted to 10 V for a voltage input of 0 to 10 VDC and to 20 mA for a current input of 4 to 20 mA, respectively. If necessary, adjust the default parameter settings. Refer to the *Multi-function Compact Inverter M1 Series Standard Type User's Manual* (Cat.No.I669) or the *Multi-function Compact Inverter M1 Series Built-in EtherCAT® Communications Type User's Manual* (Cat.No.I670) for details.

\*5. The analog output shows values that can only be used as a guide for analog meter connection. The maximum output value may differ from 10 V or 20 mA due to the variability of the analog output circuit. If necessary, adjust the default parameter settings.

\*6. Derating of the rated output current of the inverter may be required depending on the heavy/light load mode selection, operating ambient temperature, side-by-side installation, and carrier frequency settings. Refer to the *Multi-function Compact Inverter M1 Series Standard Type User's Manual* (Cat.No.I669) or the *Multi-function Compact Inverter M1 Series Built-in EtherCAT® Communications Type User's Manual* (Cat.No.I670) for details.

## Regulations and Standards

To export (or provide to nonresident aliens) any part of this product that falls under the category of goods (or technologies) for which an export certificate or license is mandatory according to the Foreign Exchange and Foreign Trade Control Law of Japan, an export certificate or license (or service transaction approval) according to this law is required.

Standard		Applicable standard
CE UKCA	EMC	EN 61800-3:2004/A1:2012
	Functional safety	EN 61800-5-2:2017 STO SIL3 EN ISO 13849-1:2015, Cat.3 / PLe
	Electrical safety	EN 61800-5-1:2017
UL	US	UL61800-5-1, Edition 1, 2012
	CA	CSA-C22.2 No.274, 2017
KC		KS-C9800-3 (Standard Type 3G3M1-□□□□□ only)
RCM		EN 61800-3:2004+A1:2012

The customer must check the conditions that must be met for compliance with the environmental standards and regulations of their respective country.

### 1. Checking use of regulated chemical substances

This product complies with regulated substances used in electrical parts based on the RoHS Directive.

For details on the Certificate of Conformance and other regulations, contact the place of purchase.

### 2. Motor efficiency regulations

This product is subject to energy efficiency regulations when it is used in motor systems that are driven by an inverter. For details on inverter efficiency with respect to motor output in accordance with EU efficiency regulations, refer to the following website.

<https://industrial.omron.eu/en/company-info/environmental/ecodesign-directive>

## M1 Series

# EtherCAT Communications Specifications

### Inverter 3G3M1 (3G3M1-A□□□□-ECT only)

Item	Specifications
Physical layer	100BASE-TX (IEEE802.3)
Connectors	RJ45 × 2 (shielded) ECAT IN: EtherCAT input ECAT OUT: EtherCAT output
Communications media	Category 5 or higher (cable with double, aluminum tape and braided shielding) is recommended.
Communications distance	Distance between nodes: 100 m max.
Process data	Fixed PDO mapping User PDO mapping
Mailbox (CoE)	Emergency messages, SDO requests, and SDO responses
Synchronization mode	Free Run Mode *1
Indicators	L/A IN (Link/Activity IN) × 1 L/A OUT (Link/Activity OUT) × 1 RUN × 1 ERR × 1
CiA 402 Drive Profile	Velocity mode

\*1. In Free Run Mode, slaves perform I/O processing (refresh I/O data) asynchronously with the communications cycle of the master. The communications cycle is determined by the cycle time of the master. For the communications response time of the EtherCAT communication unit, refer to *the Multi-function Compact Inverter M1 Series Built-in EtherCAT® Communications Type User's Manual* (Cat. No. I670). Note that Free Run Mode in the synchronization mode has a different meaning from free-run stop of an Inverter.

## Safety Function

The safety function is designed so that the safety stop function of category 0 (uncontrolled stop) specified in IEC 60204-1 is used to meet the safety standards of PL-e under ISO 13849-1.

M1 Inverters have two type STO functions. Use either or both functions in the table below according to the model you are using.

Type	STO function by safety input signals	STO function via EtherCAT communications
Standard Type 3G3M1-□□□□□□	Yes	No
Built-in EtherCAT Communications Type 3G3M1-□□□□□□-ECT	Yes	Yes

## Safety Functions

Function	Standard
STO (Safe Torque Off)	EN IEC 61800-5-2
Stop Category 0	EN IEC 60204-1

## Response Time

Response time		Remarks
STO response time	50 ms or less	Time from when the SF1/SF2 signal state changes to STO up to when power to the motor is cut off
EDM response time	50 ms	Time from when the SF1/SF2 signal state changes to STO up to when the EDM signal state changes to ON
STO function via Ether-CAT communication response time	80 ms max.	Time from when the FSoE state changes to STO up to when power to the motor is cut off

## Safety Related Parameters

Parameter	Value	Standard
PL	e	EN ISO 13849-1 EN IEC 60204-1
Cat	3	
MTTFd	>62 years	
DCavg	Medium	

Parameter		Value	Standard
SIL		3	EN IEC 61508-1 to -7 EN IEC 61800-5-2 EN IEC 62061
HFT		1	
SFF		>90 %	
STO Function by Safety Input Signal	PFH	$3.00 \times 10^{-9}$	
	PFD	$4.00 \times 10^{-5}$	
	Mission time	20 years	
STO Function via EtherCAT Communications	PFH	$1.10 \times 10^{-8}$	
	PFD	$1.10 \times 10^{-4}$	
	Mission time	10 years

## Standard Connection Diagram

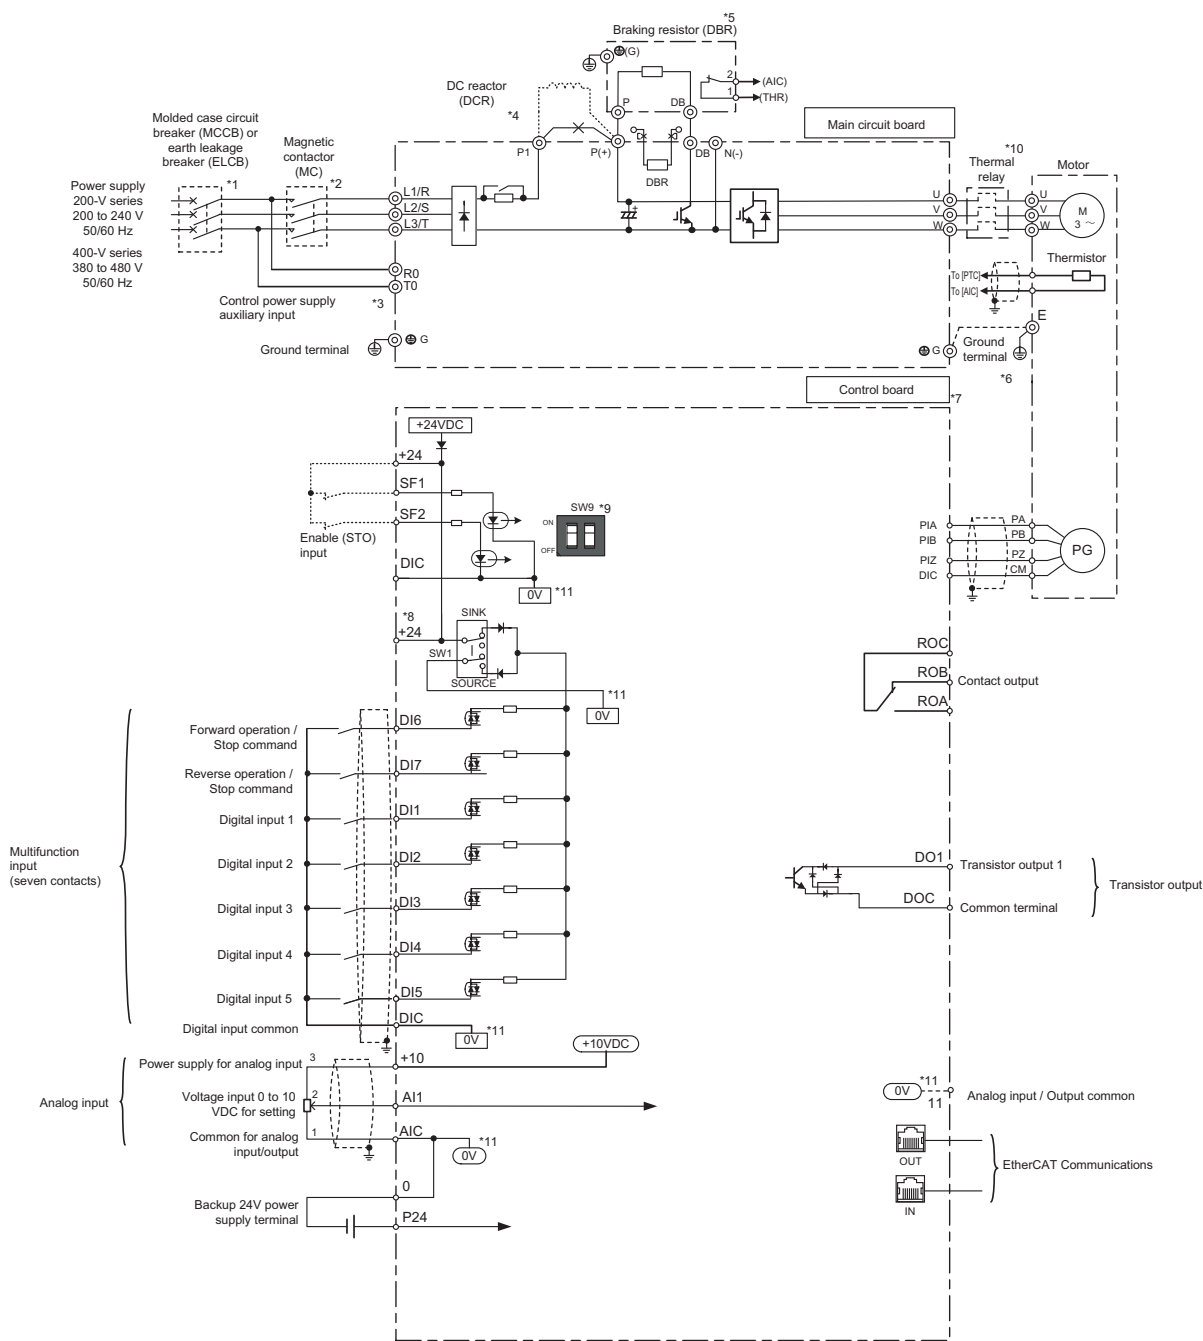

### Inverter 3G3M1

3G3M1-A□□□□

- \*1. To protect the wiring, install a molded case circuit breaker (MCCB) or earth leakage circuit breaker (ELCB) (with overcurrent protection function) recommended for each inverter on the inverter input side (primary side). Do not use circuit breakers whose rated current exceeds recommended values.
- \*2. The molded case circuit breaker and earth leakage circuit breaker are also used for insulation from the inverter's power supply. For this reason, install a magnetic contactor (MC) recommended for each inverter as required. When installing a magnetic contactor and solenoid or other coil near an inverter, connect surge absorbers in parallel.
- \*3. To enable a batch alarm signal when the protection function is activated even if the main power supply of the inverter is cut off or to display the Digital Operator at all times, connect these terminals to the power supply. (3G3M1-A2185 or later or 3G3M1-A4185 or later products) The inverter operates even when these terminals are not connected to the power supply.
- \*4. When connecting the optional DC reactor (DCR), remove the short-circuit bar between the main circuit terminals P1 and P(+) of the inverter before connecting. When the capacity of the power transformer is 500 kVA or more and 10 times or more than the rated capacity of the inverter, or when a thyristor load is connected, use a DC reactor (DCR).
- \*5. As a transistor for braking is built into the inverter, the braking resistor can be directly connected between P(+) and DB.
- \*6. The terminal for grounding the motor. Connect this terminal, as required.
- \*7. Use twisted wire or shield wire for the control signal wire.  
Generally, shield wire is grounded. However, when inductive noise from an external source is large, the influence of noise can sometimes be suppressed by connecting the shield wire to a DIC. Separate control signal wire as far as possible (at least 10 cm is recommended) from the wiring of the main circuit, and do not pass control signal wire through the same wiring duct. When wires cross, be sure to cross them so that they are almost vertical to the wiring of the main circuit.
- \*8. This switch on the printed circuit board is for specifying the operation setting of the inverter. For details, refer to *the Multi-function Compact Inverter M1 Series Standard Type User's Manual* (Cat.No.1669).
- \*9. Safety function terminals SF1 and SF2 are disabled at SW9 (double-pole switch) on the printed circuit board before shipment from the factory. When using the SF1 and SF2 terminal functions, be sure to turn each SW9 switch OFF before connecting to these terminals.
- \*10. Cut off the molded case circuit breaker (MCCB) or magnetic contactor (MC) at the auxiliary contact (manual reset) of the thermal relay.
- \*11.  $\square 0V$  and  $\circ 0V$  are separated and insulated.

# M1 Series

## Recommended EtherCAT Communications Cables

Use a straight STP (shielded twisted-pair) cable of category 5 or higher with double shielding (aluminum tape and braiding) for EtherCAT.

### Cable with Connectors

Item		Recommended manufacturer	Cable length (m)	Model
Wire gauge and number of pairs: AWG26, 4-pair cable Cable sheath material: PUR	Cable with Connectors on Both Ends (RJ45/RJ45) Standard RJ45 plugs *1 Cable color: Yellow *2 	OMRON	0.3	XS6W-6PUR8SS30CM-YF
			0.5	XS6W-6PUR8SS50CM-YF
			1	XS6W-6PUR8SS100CM-YF
			2	XS6W-6PUR8SS200CM-YF
			3	XS6W-6PUR8SS300CM-YF
			5	XS6W-6PUR8SS500CM-YF
Wire gauge and number of pairs: AWG22, 2-pair cable	Cable with Connectors on Both Ends (RJ45/RJ45) Rugged RJ45 plugs *1 Cable color: Light blue 	OMRON	0.3	XS5W-T421-AMD-K
			0.5	XS5W-T421-BMD-K
			1	XS5W-T421-CMD-K
			2	XS5W-T421-DMD-K
			5	XS5W-T421-GMD-K
	Cable with Connectors on Both Ends (M12 Straight/RJ45) Shield strengthening connector cable *3 M12/Smartclick connector and rugged RJ45 plug Cable color: Black 	OMRON	0.5	XS5W-T421-BMC-SS
			1	XS5W-T421-CMC-SS
			2	XS5W-T421-DMC-SS
			3	XS5W-T421-EMC-SS
			5	XS5W-T421-GMC-SS
10	XS5W-T421-JMC-SS			

\*1. Cables with standard RJ45 plugs are available in the following lengths: 0.2 m, 0.3 m, 0.5 m, 1 m, 1.5 m, 2 m, 3 m, 5 m, 7.5 m, 10 m, 15 m, 20 m. Cables with rugged RJ45 plugs are available in the following lengths: 0.3 m, 0.5 m, 1 m, 2 m, 3 m, 5 m, 10 m, 15 m.

For details, refer to *the Industrial Ethernet Connectors Catalog* (Cat. No. G019).

\*2. Cable colors are available in yellow, green, and blue.

\*3. For details, contact your OMRON representative.

### Cables/Connectors

Item	Recommended manufacturer	Model
Wire gauge and number of pairs: AWG24, 4-pair cable	Cable	Hitachi Metals, Ltd. <b>NETSTAR-C5E SAB0.5x4P CP *1</b>
	RJ45 Connector	Kuramo Electric Co. <b>KETH-SB *1</b>
Wire gauge and number of pairs: AWG22, 2-pair cable	Cable	Panduit Corporation <b>MPS588-C *1</b>
	Cable	Kuramo Electric Co. <b>KETH-PSB-OMR *2</b>
		JMACS Japan Co., Ltd. <b>PNET/B *2</b>
RJ45 Assembly Connector 	OMRON <b>XS6G-T421-1 *2</b>	

\*1. We recommend you to use the above Cable and RJ45 Connector together.

\*2. We recommend you to use the above Cable and RJ45 Assembly Connector together.

---

## Software

### Automation Software Sysmac Studio

The Sysmac Studio is the software that provides an integrated environment for setting, programming, debugging and maintenance of machine automation controllers including the NJ/NX-series CPU Units, NY-series Industrial PC, EtherCAT Slave, and the HMI.

For details, refer to your local OMRON website and Sysmac Studio Catalog (Cat. No. P138).

**Note:** The M1 Series is supported by Sysmac Studio version 1.52 or higher.

## Terms and Conditions Agreement

### Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

### Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

### Limitation on Liability: Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

### Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

### Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
